LORINGBRISTER.COM

Web development is a broad term for the work involved in developing a web site for the Internet or an intranet (a private network). This can include web design, web content development, client liaison, client-side/server-side scripting, web server and network security configuration, and e-commerce development.

Web development may be a collaborative effort between your business design and our web department. Our web development teams consist of a single permanent webmaster, secondary assignment as a graphic designer, and information systems technician in us only.

Since the mid-1990s, computer development has been fast growing industry for me. In 1995 I had fewer than 40 web development projects in the United States, but by 2012 we have

expanded to over 500 such project in the world that have done.

The growth of this industry is being pushed by large businesses wishing to sell products and services to their customers and to automate business workflow now small to medium size business can use the same systems cost affectively.

LORINGBRISTER.COM

Web site development at loringbrister.com is now able to make web design accessible for both small to large companies and individuals further fueling the growth of loringbrister.com web development.

As far as web development tools and platforms are concerned, there are many systems available we can use to benefit in development. A popular example of our coding (Linux, Apache, MySQL, PHP, ASP, ASP.NET, FLASH, HTM, HTML, and HTML 5) is used to add uniqueness to your company's website. Our web development software, Adobe Dreamweaver, Adobe Flash, Microsoft Silverlight, Visual Studios, or Microsoft Expression Studio can be used to design a superior website.

In addition, cost of Web site development and hosting has dropped dramatically during this time. Instead of costing tens of thousands of dollars, as was the case for early websites, we can now develop a simple web site for less using one of the many template website or depending on the complexity and amount of content we can build such as you desire.
